

EV Charging – Trevedra Farm Sennen

Trevedra Farm is pleased to be able to now offer EV charging to the public.

We have 6 x up to 22Kw untethered EV chargers available to be used.

These are located in the car park area.

Our EV chargers are untethered units, so you will be required to bring your own

Type 2 EV charging lead to utilise the chargers.

Our EV chargers use an app based payment system for charging the user a fee for their fill-ups, so please follow the simple steps below to make charging as easy as possible when you stay with us.

1. Download the app “FUUSE” on your smartphone before your stay with us.

This can be found on Apple's App Store & Google Play Store.

2. Setup your own account on the App, registering your payment card ready for your stay with us.

3. Pull up to the EV charger, plug your lead into the charger and into your EV.

(Our Wifi details if you don't have a good phone signal – Trevedra Free – password free1000 OR Trevedra Campsite – password – campsite1)

5. Open up the “FUUSE” app, simply scan the QR code next to the EV charger or select the charger from the list on the home screen. Press “Start”.

6. Stop your session anytime in the app and unplug your EV or the session will be stopped automatically when your EV is full.

7. You can also use the QR codes at the EV points to download FUUSE.

NB You may see a pre authorisation charge while you are charging. This will be refunded when charging complete and you will only be charged for Kw used.

You can contact FUUSE via the APP for any queries.

Tea & Coffees are available from the campsite shop during opening times, and you can walk to Gwynver Beach from the site.
